HAIR BY V SIZE GUIDE

From experience, many clients with a circumference of around 21.5 inches (54.5 cm) prefer an XS in lace top wigs (including myself).
This is because the ear-to-ear and front-to-nape measurements often align better, while the circumference of the cap will gradually adapt thanks to its natural stretch, resulting in a secure, snug and comfortable fit.
A slightly snug fit is often preferred, as it feels more secure and looks more natural.
Most of my clients fall within XS and S, which is why these are the sizes I focus on for stock.
Size charts are a guideline, but fit is influenced by multiple factors such as cap construction, stretch, and head shape.

CENTIMETERS

WIG TYPE	SIZE	CIRCUMFERENCE	FRONT TO NAPE	EAR TO EAR OVER THE TOP
LACE TOP WIGS	XS	49-51	33	32
	S	51-53	34-35	33
